

***We don't point a finger,
We lend a hand***

SpeedGauge Safety Center® - the essential speed monitoring and driver performance improvement solution. Providing reliable and dynamic reporting on actual speed vs posted speed limits for fleets and small businesses - everywhere. Using speed analysis as a simple yet transformative coaching metric to improve safety awareness and practices at any fleet for immediate and long-lasting risk reduction and operational gains.

Offered as a value added software upgrade, the SpeedGauge Safety Center improves existing GPS monitoring capabilities, enhances camera and other MVR solutions.

A highly valued, affordable software solution used by thousands of fleets in the US and Canada.

No hardware needed. No installation required. Use data already collected.

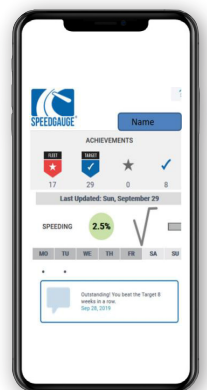

- Sold as a value-added service
- Subscribing to SpeedGauge is easy
- Account setup is fast, simple and handled for you

The essential driver coaching and performance improvement solution reduces speeding and driving risk... saving money, saving lives.

DRIVER CENTER

The **SpeedGauge Safety Center** has an immediate, positive impact. New users typically reduce speeding by 50% within the first 30 to 60 days.

The **SpeedGauge Driver Center** provides predictive analytics and responsive reporting along with access to a manager portal for tracking driver achievement reporting.

Enrollment is easy!
